

Membraloop Point-of-Use Ultrafiltration

Compact Hollow-Fiber Filtration for Safe Drinking Water.

Membraloop

Technical Specifications

Parameter	Specification / Value
C-MEM hollow-fibre UF	Membrane technology
Approximately 0.020 um	Membrane pore size
Approximately 3 m2	Membrane surface area
Approximately 0.8 L/min at 2 m head	Gravity flow
Approximately 8 L/min at 2 bar	Pump-driven flow
Reported as 3⁄4-inch connections	Connections
Point-of-use, small raw-water and drinking-water applications	Uses
