

Aquaclean RO System

High-Purity Brackish & Seawater Desalination.

Technical Specifications

Parameter	Brackish-water RO	Seawater RO
Typical operating pressure	10-28 bar	55-82 bar
Typical recovery	70-85%	35-50%
Membrane type	Brackish-water polyamide	Seawater polyamide
RO feed turbidity	Preferably <0.2-1 NTU	Preferably <0.2-1 NTU
RO feed SDI??	<5; < 3 preferred	5 maximum
Free chlorine	0 mg/L at membrane inlet	0 mg/L at membrane inlet
Cartridge filter	1-5 um	1-5 um
Typical permeate TDS	Dependent on feed; often <1-5% of feed TDS	Dependent on feed and membrane
Main controls	Feed pressure, permeate flow, conductivity, differential pressure and recovery	Feed pressure, permeate flow, conductivity, differential pressure and recovery
